

QUADRA'S SQUARE PUZZLE

Please note that there several solution for each square puzzle. As long as the rows and columns contain the same numbers then the answer should work even if the numbers are in different place.

One solution for each puzzle is given.

1)

-4 -3 -2 -1 1 2 3

Total must be 0

2	-3	1
0		-4
-2	-1	3

2)

-4 -3 -2 -1 1 2 3

Total must be -3

1	0	-4
-1		3
-3	2	-2
